

## Mirror Sticker Spec 2

**Please supply the following guidelines when supplying camera ready artwork**

White out text on four colour process scans needs to be a minimum of 8pt thin type faces tend to fill in and may not be readable.

All clipping paths must be smooth paths eg. Photoshop paths drawn with the pen tool will produce a better result than using the magic wand as a selection then creating a path from the selection.

Cutter guide must be positioned on top of your artwork preferably in Magenta or Cyan.

A minimum of 4mm bleed is required on graphic elements or scans.

Position elements a minimum of 3mm from the edge of the mat on all sides.

**Should you require any further information please contact:**
